*Odontoglossum grande* (The Tiger Orchid)

E.W. McLellan Co. Orchids 1951  
San Francisco, Calif.

Via Air

Via Railway Express

Via Greyhound Bus

Via Truck

## Shipping

Shipments are sent via Express wherever practicable, unless otherwise requested. Modern shipping by air makes it advisable to ship out of pot in some instances and in all shipments of short duration when the plants are not in bud or bloom.

By careful packing, we are shipping our plants successfully to all parts of the United States and to those foreign countries where international trade permits. However, we are not responsible for the safe arrival of the plants. Once the plants are accepted by the carriers, they are responsible for the shipment. Examine the plants carefully upon their arrival, and file an immediate claim with the express company if there is the slightest indication of damage. The express company must see the plants immediately to have a claim considered. We will gladly replace any damaged plants, but the claim must be filed to permit us to be reimbursed by the express company.

## Conditions of Sale

**SUBJECT TO PRIOR SALE:** Orders are filled in the order of receipt. If possible, list an alternate choice to avoid delay, as we make no substitutions unless given specific permission to do so.

**PRICES SUBJECT TO CHANGE:** In these modern times, prices are subject to change.

**CREDIT:** Until credit is established, all purchases are CASH or C.O.D.

**SALES TAX:** California customers, please add 3% State Sales Tax.

**PRICES F.O.B. SAN FRANCISCO.**

## Quantity Discounts

On quantity purchases, we are offering the following discounts:

\$50.00 to \$250.00 .....	10%
\$250.00 to \$1000.00 .....	20%
Over \$1000.00 .....	30%

## Policy

It is our policy to give all the information that we have on anything that we sell.

We will gladly accept membership applications for the American Orchid Society, Botanical Museum of Harvard University, Cambridge 38, Mass., or for the California Orchid Society, 697 Arlington Avenue, Berkeley 7, California.

*Orchid Growers - Exporters, Importers, Hybridizers*

---

This catalog has listed those seedlings, crosses, and plants that are of extreme interest to the commercial man or the amateur with a large collection, but more and more we have tried to make our listings understandable to those thousands of new orchid enthusiasts who need a source of materials for their small hobby, carried on within their own homes. Thus, the last part of the catalog is devoted almost entirely to those things of interest to the new enthusiast.

We as professional growers have seen a migration of orchid culture during the past decade from the conservatories of the very wealthy to the window sills of the living rooms, or even the bedrooms of anyone with a modern, evenly heated home, and rightly so. People everywhere are finding orchid plants as easy to grow—or even easier—than any of the potted plants they have been growing indoors for years.

With this in mind, we are listing on the following pages a fine group of orchid plants suitable not only for the commercial men, but for the home growers as well—those with greenhouses and many plants, or those with one or two plants, or perhaps no plants at all, but just a wish to acquire one or two to grow on a strategically located window sill somewhere about the house.

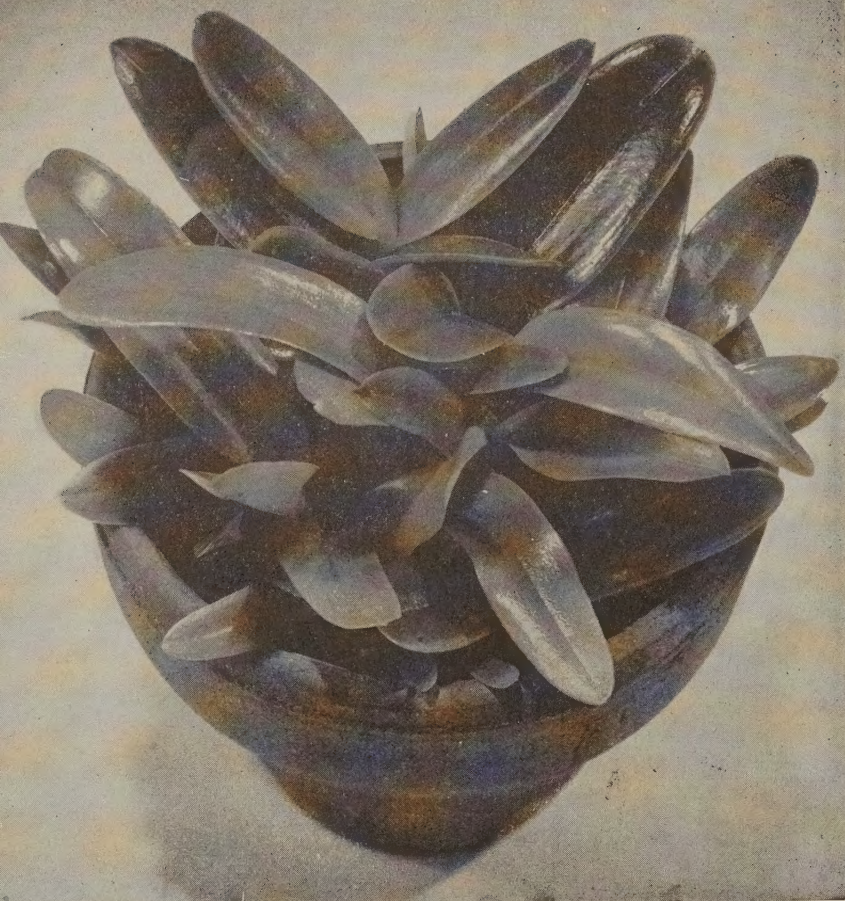

Whatever size plants you wish to order, from tiny seedlings up to mature, flowering-size plants, you will find McLELLAN ORCHIDS are top quality, reasonably priced, and in perfect growing condition.

We feel sure you will be more than satisfied with the shipments we make to you—the packing, the shipping, the price, the plants. We shall enjoy any opportunity to serve you in any way.

## ORCHIDS BLOOMING IN THE LIBRARY

A McLELLAN COMMUNITY POT

## McLellan Communities

Our 3" community pots of cattleyas are planted with 20 or more seedlings, but our communities of odontoglossums will have 10 or more seedlings from transplanted flasks. All are about ready to be shifted to thumb pots (1½"), and are sturdy, vigorous-growing stock.

The accurate description of the flower of both parents used in the crosses will help you to make your selections.

Some of the crosses listed below will be available as communities for a limited time only. On orders placed for lower cross numbers after July 1, 1951, we suggest you write us to check on availability and avoid disappointment, or give us the permission to substitute similar crosses.

Cross No.	Description	Price (Per pot of 20)
365—C. JEVAN	Petals 7½" x 3¼". Rosy dark lavender, labellum bright magenta with gold eyes in the throat—April	\$ 8.50
X		
C. TITYUS	Petals 7¼" x 2¾", rose mauve, labellum bright purple with golden yellow throat—March.	
<b>Purpose:</b>	Should give a winter flower of good production.	
429—C. MOSSIAE	Petals 7¾" x 2¾", bright lavender with darker labellum, very little yellow in throat—April.	8.50
X		
Blc. J. K. LILLY	Petals 6¾" x 3", dark lavender, labellum clear magenta with unveined, magenta throat—October.	
<b>Purpose:</b>	To get an improved Mossiae-type hybrid for spring production.	
494—C. COWANIAE	Petals 8½" x 2¾", lavender with darker labellum. Golden orange eyes in the throat—May.	8.50
X		
Lc. NYMPH v. colossus	Petals 9½" x 3½". Darker lavender, magenta labellum, yellow eyes in throat—June.	
<b>Purpose:</b>	Spring and summer flowering, this cross should be an excellent producer.	

Cross No.	Description	Price (Per Pot of 20)
533—Bc. DORIS	Petals 7" x 2½", dark lavender with a dark labellum, yellow-green eyes in throat—October.	\$ 8.50
X		
Lc. NYMPH	Petals 8¾" x 3", darker lavender petals and sepals with a dark magenta labellum, yellow-green throat—July.	
<b>Purpose:</b>	A large flowered brasso-type cattleya of good color. Lc. Nymph should give exceptional strength to the plant.	
536—Blc. J. K. LILLY	Petals 7½" x 3¼", lavender with magenta labellum, light edge. Gold eyes in throat—December.	8.50
X		
Lc. NYMPH	Petals 8¾" x 3", dark lavender with dark magenta labellum, yellow-green throat—July.	
<b>Purpose:</b>	Flowers should be very large with good shape, and should retain only slight brasso characteristics.	
565—Lc. BABYLON	Petals 8¼" x 3½", medium lavender with light magenta labellum, light edge. Gold eyes and veins in throat—July.	8.50
X		
Slc. PRINCESS SOULANGE	Petals 6¼" x 2¾", dark lavender with purple veining in tips of the petals, magenta velvet labellum with gold veins in throat—October.	
<b>Purpose:</b>	Should produce a Sophrolaeliocattleya of large size and excellent shape with good growth habits.	
573—C. NEBO	Petals 8" x 3½", medium lavender, labellum magenta with yellow throat—December.	8.50
X		
Lc. KAREN	Petals 7" x 2¾", medium lavender, labellum deep magenta with gold eyes in the throat—October.	
<b>Purpose:</b>	Excellent commercial flower for Christmas production.	
574—C. NEBO	Petals 7¾" x 2¾", lavender, labellum magenta with yellow orange area in the throat—December.	8.50
X		
Lc. OLIVER LINES	Petals 7½" x 3", medium lavender with slight stripe in petals. Labellum deep Tyrolean purple with no yellow in throat—September.	
<b>Purpose:</b>	A Christmas hybrid of good color, good shape, and good texture.	
607—C. BANDIT	Petals 7¾" x 3", medium lavender, labellum magenta with a light edge, gold eyes in throat—November.	8.50
X		
Lc. HAIDEE	Petals 7¾" x 3¼", glowing rose purple, labellum intense velvety wine-red—November.	
<b>Purpose:</b>	Rich color should be the theme in this cross. Both parents bloom in the early winter.	
659—C. APALACHEE	Petals 8½" x 2¾", medium lavender, labellum magenta and gold—December.	8.50
X		
Lc. HERTHA	Petals 7" x 2¾", light lavender with magenta labellum, gold eyes and veins in throat—June.	
<b>Purpose:</b>	All crosses made with Lc. Hertha have good color and texture, with remarkable shape.	
682—C. ALESSANDRO	Petals 7½" x 3", medium lavender, labellum purple with light bronze throat—June.	8.50
X		
Lc. CUESTA	Petals 7" x 2¾", rose magenta, labellum deep crimson purple—February.	
<b>Purpose:</b>	This cross should produce well for the winter season. Alessandro with its excellent production, and Cuesta with its rich color should make a good winter cut flower.	
700—Lc. ATLANTIS	Petals 8½" x 3", rose mauve, labellum warm crimson purple—October.	12.50
X		
C. PROSPECTOR v. NANCY ANNE	Petals 6¾" x 3", rose lavender, labellum crimson with yellow throat area—March.	
<b>Purpose:</b>	Lc. Atlantis is a perennial favorite with us. It consistently produces fine flowers on long stems, and combined with a good Cattleya Prospector, results should be outstanding.	

Cross No.	Description	Price (Per Pot of 20)
704—C. TELLUS—	Petals 7½" x 3", medium rose lavender, labellum deep magenta with large yellow throat area—January.	\$ 8.50
X		
Lc. HERTHA—	Petals 7" x 2¾", light lavender with magenta labellum, gold eyes and veins in throat—June.	
	<b>Purpose:</b> Should produce vigorous growers bearing large, heavy textured flowers with yellow eyes in throats.	
723—C. BARBARA BILLINGSLEY—	Petals 6¾" x 2½", pure white, labellum white with lemon yellow throat—December.	8.50
X		
Blc. MERU—	Petals 9" x 3", white, with a yellow-chartreuse throat. Balance all white with exception of lavender spot on lower portion of lip—January.	
	<b>Purpose:</b> Parents both very fine whites, but some color may result from the Blc. Meru parent.	
749—Lc. GOLDEN CHARM—	Petals 4¾" x 7/8", a rich orange throughout—February.	8.50
X		
Lc. MEDON—	Petals 5¼" x 2¾", a lovely rich rose amethyst with dark maroon labellum shading to amethyst purple, yellow veins in throat, exceptionally heavy texture—January.	
	<b>Purpose:</b> Produce a novelty plant of unusual, good colors and texture. Many unique colors may result from this combination—yellow, bronze and possibly purple.	
850—C. DUPREANA—	Petals 8" x 2¾", medium dark lavender, magenta velvet labellum with light edge. White to yellow throat with gold eyes, veined throat—June.	8.50
X		
Lc. ALTURA—	Petals 6¼" x 2¾", very dark lavender, labellum exceptionally deep magenta. Throat light with a trace of yellow shading to brown—June.	
	<b>Purpose:</b> Dark, heavy textured flower for spring and summer.	
852—C. BOW BELLS v. exquisita—	Petals 6¾" x 2¾", all white with a bright yellow in throat of labellum. Has exceptionally fine conformation—July.	8.50
X		
C. PAVLOVA v. BALLERINA—	Petals 6¼" x 2", white, labellum lemon yellow—May.	
	<b>Purpose:</b> Should produce a nice white of good shape and texture for summer and fall.	
853—Lc. SUSAN—	Petals 8¼" x 3¼", petals and sepals deep lavender, labellum dark magenta, light yellow eyes in throat—July.	8.50
X		
Lc. ALTURA—	Petals 6¼" x 2¾", very dark lavender, labellum exceptionally deep magenta, light throat with trace of yellow—June.	
	<b>Purpose:</b> Summer and fall flowering. Should have excellent texture and size, medium to dark.	
855—Lc. CARRIE GOLDFARB—	Petals 8¼" x 3", medium lavender, very deep magenta labellum with slight trace of white in throat—September.	8.50
X		
C. PROSPECTOR v. HELEN BUSS—	Petals 7¼" x 3¼", rose lavender, labellum crimson with yellow throat area—March.	
	<b>Purpose:</b> Fall to winter, should produce large, well-shaped flowers, medium to dark lavender. Plants should have outstanding vigor.	

Cross No.	Description	Price (Per Pot of 20)
860—C. DOWIANA aurea—	Petals 6½" x 2¾", Nankeen yellow, with rich crimson purple, labellum streaked and lined with old gold—July.	\$12.50
X		
Lc. S. J. BRACEY—	Petals 6¾" x 2½", bronze-yellow, labellum rosy red with yellow veins—July.	
	<b>Purpose:</b> This is a remake of a proven cross, producing flowers from green-yellow to deep bronze with red lips.	
881—Lc. S. J. BRACEY—	Petals 5½" x 2", bronze-yellow, labellum rosy red with yellow veins—July.	8.50
X		
Lc. ISOTTA—	Petals 6½" x 2½", extremely heavy textured petals of lustrous mauve. Isthmus lip of warm ruby purple—August.	
	<b>Purpose:</b> Should produce a great variation of colors, predominately yellow, some with isthmus lips. The addition of Isotta parent should add vigor which is certainly desirable in yellow crosses.	
893—Lc. ATLANTIS—	Petals 6¾" x 2¾", rose magenta, labellum deep crimson purple—January.	8.50
X		
C. HEYDAY—	Petals 7¼" x 3", medium lavender with yellow gold veination in throat of dark lavender labellum—September.	
	<b>Purpose:</b> Should produce a winter or spring hybrid of good shape and variation of dark colors.	
899—Lc. ROSAMUNDE—	Petals 7¾" x 3", rich, rose magenta, labellum crimson purple—June.	8.50
X		
C. TITRIANAE v. CHOLET—	Petals 8" x 2¾", medium lavender, labellum deep mauve, yellow-gold eyes—December.	
	<b>Purpose:</b> Fall and winter flowering, should produce vigorous plants of good production. Large, medium to deep lavender flowers on good stems.	

Lc. S. J. BRACEY—Used in Crosses Nos. 522, 534, 881

Cross No.	Description	Price (Per Pot of 20)
904—Lc. ROSAMUNDE—	Petals 7" x 2 7/8", rich, rose ma-	\$12.50
X	genta, crimson purple labellum—June.	
C. TITYUS—	Petals 7 1/4" x 2 3/4", rose mauve, la-	
	bellum large solid crimson purple with	
	yellow throat—January.	
<b>Purpose:</b> Fall and winter, a vigorous grower, medium to dark lavender flowers with yellow eyes in the throat.		

Cross No.	Description	Price (Per Pot of 20)
937—Lc. MEDON—	Petals 6 3/8" x 2 1/4", a lovely rich	\$12.50
X	rose amethyst with dark maroon label-	
	lum shading to amethyst purple, yellow	
	veins in throat, exceptionally heavy tex-	
	ture—January.	
Lc. ATLANTIS—	Petals 8 1/2" x 3", rose mauve, la-	
	bellum warm crimson purple—October.	
<b>Purpose:</b> An exceptionally heavy textured flower, colors varying from medium to very dark. Variable season.		

## McLellan Odontoglossum Community Pots

ODONTOGLOSSOUM BARAK, a yellow crispum hybrid

Cross No.	Description	Price (Per Pot of 10)
811—ODONTOGLOSSUM DOLABELLA—	Petals 3" x 7/8",	\$ 8.50
X	light purple, with white markings, label-	
	lum same as petals with a gold center.	
ODONTOGLOSSUM NINA —	Petals 3 1/2" x 1 1/8",	
	maroon with a lavender and white mar-	
	gin, labellum maroon and white, with	
	gold throats.	
<b>Purpose:</b> We expect various combinations of purple, maroon and white, with a scattered season, peaking in late winter.		
812—ODONTOGLOSSUM DOLABELLA—	Petals 3" x 7/8",	8.50
X	light purple, with white markings. La-	
	bellum same as petals, with a gold cen-	
	ter.	
ODONTOGLOSSUM ESPOIR —	Petals 3 1/2" x 1 1/4",	
	maroon with white markings. Sepal and	
	petal tips contrasting white and laven-	
	der. Labellum maroon, white and gold.	
<b>Purpose:</b> This should produce various combina-		
tions of white, maroon and purple, with a scat-		
tered flowering season.		
832—ODONTOGLOSSUM SIRION—	Petals 3 1/4" x 1 1/8",	8.50
X	cream with light yellow edging, label-	
	lum cream with brown spots, throat	
	gold with maroon markings.	
ODONTOGLOSSUM BEEDING —	Petals 2 1/4" x 1",	
	golden yellow with brown spots, la-	
	bellum light cream yellow with brown	
	markings, throat gold with brown mar-	
	king.	
<b>Purpose:</b> A yellow flowered hybrid having vary-		
ing amounts of brown spotting. Season scattered,		
winter or spring.		
835—ODONTOGLOSSUM NINA—	Petals 3 1/2" x 1 1/8",	8.50
X	maroon with a lavender and white mar-	
	gin. Labellum maroon and white with	
	gold throat.	
ODONTOGLOSSUM DIONYZIA—	Petals 3 3/8" x 1 1/4",	
	dark red with petals tipped lavender,	
	labellum dark red and white with gold	
	and maroon throat.	
<b>Purpose:</b> A hybrid with flowers having various		
combinations of red, maroon, lavender, and white		
with a scattered season.		
877—ODONTOGLOSSUM BEEDING—	Petals 2 1/4" x 1",	8.50
X	yellow, heavily marked with red, la-	
	bellum lighter yellow with red mark-	
	ings and a bright yellow throat.	
ODONTIODA CARMINE—	Petals flamingo red with	
	white edging, labellum similar with	
	gold throat.	
<b>Purpose:</b> A hybrid having flowers of various		
shades of yellow and red. Stems are longer in		
Odontioda crosses, and have many more flowers		
per stem than Odontoglossum hybrids.		

# McLellan Seedlings 1 ½ and 2 ¼ Inch Pots

Cross No.	Parent Description	Size	Price
<b>C. LADY JOAN</b> —Petals 6¾" x 2½", white, with white labellum, yellow throat—May. <b>X</b>		<b>2¼"</b>	<b>\$3.00</b>
<b>C. ESTELLE alba</b> —Petals 7½" x 2¾", white with yellow throat—March.  <b>Purpose:</b> To produce a white with yellow throat of good size and shape, to flower from early to late spring.			
<b>66—C. ALESSANDRO</b> —Petals 7" x 2½", medium lavender, labellum purple with light bronze throat—December. <b>X</b>		<b>2¼"</b>	<b>3.00</b>
<b>Lc. TREMPEALEAU</b> —Petals 7½" x 2¾", rich lavender, labellum crimson purple with gold throat—December.  <b>Purpose:</b> To produce an extremely vigorous, Christmas season hybrid of good flower color and shape on a satisfactory stem.			
<b>67—C. APALACHEE</b> —Petals 7½" x 2¾", medium lavender, large orange-yellow labellum—December. <b>X</b>		<b>2¼"</b>	<b>3.00</b>
<b>Lc. TREMPEALEAU</b> —Petals 7½" x 2¾", rich lavender, labellum crimson purple with gold throat—November.  <b>Purpose:</b> A vigorous, Christmas flowering hybrid, with exceptionally large, dark flowers, yellow throat, excellent shape and good production.			
<b>70—C. NEBO</b> —Petals 6½" x 2¾", medium lavender, labellum magenta with yellow throat—December. <b>X</b>		<b>2¼"</b>	<b>3.00</b>
<b>Lc. ELISSA</b> —Petals 7" x 3", rich rose magenta, labellum crimson purple—November.  <b>Purpose:</b> An excellent growing, good producing medium to dark flowered hybrid for the Christmas season.			
<b>82—(C. DINAH x Lc. MATADOR)</b> —Petals 7" x 2½", purple splashed, labellum rich rose purple—August. <b>X</b>		<b>2¼"</b>	<b>3.00</b>
<b>C. GENERAL PULTENEY v. PERRINI</b> —Petals 7½" x 3⅛", medium lavender with rich purple stripe, labellum crimson purple with yellow eyes—January.  <b>Purpose:</b> A large sized, early winter flower with a distinct tendency to have well marked, striped petals of good contrasting colors.			
<b>110—C. H. B. TURNER</b> —Petals 8" x 3½", dark lavender, labellum deep magenta with ruffled edge and rich gold throat—December. <b>X</b>		<b>2¼"</b>	<b>3.00</b>
<b>C. LEDA splendens</b> —Petals 5½" x 2⅜", rich rose with striped yellow throat—November.  <b>Purpose:</b> An extraordinary heavy producing Christmas hybrid of good color.			
<b>115—Lc. ATLANTIS</b> —Petals 8" x 3⅛", dark lavender, labellum crimson purple with yellow throat—January. <b>X</b>		<b>2¼"</b>	<b>4.00</b>
<b>Lc. ATLANTIS</b> —Petals 8¼" x 3⅛", rose magenta with darker center stripe, labellum and throat velvety crimson purple—February.  <b>Purpose:</b> To produce a superb strain of dark colored, productive hybrids, flowering in late fall and winter, from which to select parents for future breeding.			

A McLELLAN UNFLOWERED SEEDLING

Cross No.	Parent Description	Size	Price	Cross No.	Parent Description	Size	Price
118—Lc. CHEVALIER—	Petals 8" x 3", dark lavender, labellum crimson purple—April.	2 1/4"	\$ 4.00	172—C. PRISCILLA alba—	Petals 8 1/4" x 2 7/8", pure white tipped with purple, labellum violet purple with yellow throat—May.	2 1/4"	\$ 4.00

Lc. ATLANTIS—Petals 7" x 2¾", rose mauve, labellum warm crimson purple—October.

**Purpose:** A vigorous rich colored hybrid for early winter. Flowers should be large and well shaped.

281—C. NEBO—	Petals 6¼" x 2½", lavender, labellum magenta with a generous yellow-orange area in the throat—December.	1½"	1.50
X			

C. H. B. TURNER—Petals 7" x 3", medium lavender, large round labellum of solid crimson and a yellow throat—October.

**Purpose:** An improved, larger, darker-flowered C. Nebo, which to date has been our most consistent Christmas flowering hybrid.

302—C. BARBARA BILLINGSLEY—	Petals 7" x 2¾" pure white, labellum white with lemon yellow throat—January.	1½"	2.00
X			

C. BARBARA BILLINGSLEY—Petals 7½" x 3", pure white, labellum white with lemon yellow throat—January.

**Purpose:** A winter blooming pure white of excellent size and production.

304—Lc. CABAZON—	Petals 7½" x 2⅞", medium lavender, labellum rich magenta with gold throat—January.	1½"	1.50
X			

C. NEBO—Petals 6¾" x 2⅝", medium lavender, labellum magenta with orange-yellow throat—December.

**Purpose:** A good textured hybrid for the early winter.

319—C. SIR PERTINAX—	Petals 8½" x 2⅞", medium lavender, labellum rose magenta with yellow throat—February.	1½"	1.50
X			

Lc. ATLANTIS—Petals 8" x 3", rose mauve, labellum crimson purple—April.

**Purpose:** A very vigorous, good colored hybrid for the winter season.

350—C. TITYUS—	Petals 7¼" x 2¾", rose mauve, labellum bright purple with golden yellow throat—March.	1½"	1.50
X			

C. NEBO—Petals 7¾" x 2¾", medium lavender, labellum magenta with yellow throat—December.

**Purpose:** To make C. Bandit, which is an extremely satisfactory, early winter hybrid of large size and color.

C. TELLUS—Used in Crosses Nos. 273, 704

Cross No.	Parent Description	Size	Price
-----------	--------------------	------	-------

367—C. PROSPECTOR v. HELEN BUSS—	Petals 7¼" x 3¼", rose lavender, labellum crimson with yellow throat area—March.	1½"	\$ 1.50
X			

C. TITYUS—Petals 7¼" x 2¾", rose mauve, labellum bright purple with golden throat—March.

**Purpose:** To make C. Pilgrim, a very satisfactory flower for late winter and early spring production.

369—C. VARUNA—	Petals 7½" x 2¾", entire flower dark magenta, labellum a shade darker than the rest of the flower—September.	1½"	1.50
X			

C. PROSPECTOR v. HELEN BUSS—Petals 7¼" x 3¼", rose lavender, labellum crimson with yellow throat area—March.

**Purpose:** To produce a new, darker C. Prospector type hybrid, which is noted for its productivity and vigor. The season will be variable, peaking in the winter.

372—Lc. MEM. HELENE AMMENHEUSER—	Petals 7¼" x 3⅛", rose lavender, labellum rich purple with yellow throat—March.	1½"	1.50
X			

Lc. MIRABELLE—Petals 7½" x 3¼", rose mauve, labellum crimson purple with cream yellow side zones—November.

**Purpose:** A large, dark-flowered, winter blooming hybrid of vigorous growth habit.

373—C. TALISMAN—	Petals 7¼" x 2⅝", rose lavender, labellum rich magenta with good yellow throat—March.	1½"	1.50
X			

Lc. ATLANTIS—Petals 8¼" x 3⅛", rose magenta, labellum deep crimson purple—January.

**Purpose:** A strong growing, winter blooming hybrid, producing good textured, dark flowers.

380—Blc. MOMERCIA—	Petals 6¼" x 2¾", deep rose lavender, labellum crimson purple with golden throat—March.	1½"	1.50
X			

C. PROSPECTOR—Petals 7" x 3", rose lavender, labellum rose magenta with light margin and a yellow throat—March.

**Purpose:** An exceptional, good quality flower for the early spring season that will resemble the Laeliocattleya, rather than the Brassocattleya.

Cross No.	Parent Description	Size	Price
390—C. MOSSIAE—	Petals 7¼" x 2½", medium lavender, labellum rose purple with mauve edging and yellow throat—April.	1½"	\$ 1.50
X			
Blc. MOMERCIA—	Petals 6¼" x 2¾", deep rose lavender, labellum rich crimson purple with golden throat—March.		
	<b>Purpose:</b> A hybrid to replace C. Mossiae, this should have considerably more color, and improved texture.		
398—C. MOSSIAE—	Petals 7¾" x 2¾", rose lavender, labellum rose purple with yellow orange throat—April.	1½"	1.50
X			
Lc. CUESTA—	Petals 7" x 2¾", rose magenta, labellum deep crimson purple—February.		
	<b>Purpose:</b> A late winter and early spring hybrid; both parents are very fine types.		
409—C. MONMOSS—	Petals 7" x 3", medium lavender, labellum dark magenta with gold throat—April.	1½"	1.50
X			
Lc. MEM. HELENE AMMENHEUSER—	Petals 7¼" x 3⅛", rose lavender, labellum rich purple with yellow throat—March.		
	<b>Purpose:</b> A hybrid of much better size, color and texture than C. Mossiae, which will equal the production of the C. Mossiae during the same season.		
433—C. COWANIAE—	Petals 10" x 3¼", medium lavender, labellum gold overlaid with magenta in the ruffled margin—May.	1½"	1.50
X			
Lc. ATLANTIS—	Petals 8¼" x 3⅛", rose magenta with darker center stripe, labellum and throat velvety crimson purple—February.		
	<b>Purpose:</b> A late winter and early spring hybrid to replace C. Mossiae.		
435—C. COWANIAE—	Petals 9½" x 3¼", medium lavender, labellum magenta with golden orange throat—May.	1½"	1.50
X			
Blc. MOMERCIA—	Petals 6¼" x 2¾", deep rose lavender, labellum rich purple with golden throat—March.		
	<b>Purpose:</b> A fine textured hybrid for the spring season.		
440—C. PAVLOVA v. BALLERINA—	Petals 6¼" x 2", pure white, labellum lemon yellow—May.	1½"	1.50
X			
C. BARBARA BILLINGSLEY—	Petals 8" x 3", pure white, labellum ruffled white with clear golden throat—January.		
	<b>Purpose:</b> A well-shaped, excellent textured, white cattleya, with a scattered season from Christmas to Easter.		
454—C. CONCINNITY—	Petals 7¾" x 2⅞", pure white, labellum white with a light orange throat—May.	1½"	1.50
X			
C. BARBARA BILLINGSLEY—	Petals 6¾" x 2⅞", pure white, labellum white with orange throat—March.		
	<b>Purpose:</b> A pure white cattleya producing and growing exceptionally well for the winter and spring season.		
464—C. COWANIAE—	Petals 7" x 2¾", medium lavender, magenta labellum with yellow throat—May.	1½"	1.50
X			
Lc. CABAZON—	Petals 6¾" x 3", lavender petals, magenta labellum with yellow eyes in throat—May.		
	<b>Purpose:</b> A large well-colored flower with a scattered season.		

Cross No.	Parent Description	Size	Price
473—Lc. NYMPH—	Petals 8½" x 2¾", rose lavender, labellum rich magenta with yellow throat—June.	1½"	\$ 1.50
X			
Lc. CABAZON—	Petals 6" x 2¾", rich rose magenta, labellum rich crimson purple and golden throat—June.		
	<b>Purpose:</b> A really fine hybrid with a scattered season, peaking in June. Flowers should be outstanding on good stems.		
476—Lc. ROSAMUNDE—	Petals 8¾" x 3", rich rose magenta, labellum crimson purple—June.	1½"	1.50
X			
Lc. CABAZON—	Petals 6½" x 2¾", rich rose lavender, labellum crimson purple with gold throat—May.		
	<b>Purpose:</b> Fine color, quality and shape should result from this laeliocattleya combination. Expect a scattered season of bloom peaking in early summer.		
481—C. BEN NEVIS—	Petals 9" x 2¾", pure white with white labellum, gold eyes and throat, some veining—June.	1½"	1.50
X			
C. BARBARA BILLINGSLEY—	Petals 7¾" x 2¾", white petals and labellum, orange eyes in throat—March.		
	<b>Purpose:</b> A white cattleya with yellow throat for the late winter and spring season.		
484—C. PORTOLA—	Petals 7½" x 2⅞", lavender with magenta velvet labellum, creamy gold eyes in throat—June.	1½"	1.50
X			
Lc. CABAZON—	Petals 6" x 2¾", bright, dark lavender, red-violet velvet labellum, clear yellow gold eyes and veins in the throat—June.		
	<b>Purpose:</b> A fine, richly-colored cattleya for late spring and early summer.		
522—Lc. S. J. BRACEY—	Petals 6¾" x 2½", bronze-yellow, labellum crimson purple—July.	1½"	2.00
X			
C. TRIUMPHANS—	Petals 6" x 2¼", creamy yellow, labellum crimson purple—July.		
	<b>Purpose:</b> A good novelty laeliocattleya, producing good textured yellow and bronze flowers in the summer and fall. The seedlings are fine growers.		
534—Lc. S. J. BRACEY—	Petals 6¾" x 2¼", yellow gold with red veining, rosy magenta labellum and gold eyes in throat—September.	1½"	2.00
X			
Lc. YASMIN—	Petals 7¼" x 2", red-bronze with magenta labellum—May.		
	<b>Purpose:</b> A novelty cross, this will have yellow, peach, bronze, and magenta shades. The seedlings are good growers, and should produce well. Season will be extended possibly over six months.		
625—C. HERMOSA—	Petals 7" x 2⅝", dark lavender, labellum has magenta center with lighter margin, small dull gold eyes, creamy veins in throat, which has a maroon base—November.	1½"	1.50
X			
Lc. MIRABELLE—	Petals 7½" x 3¼", medium petals with darker labellum, yellow eyes on a dark throat—November.		
	<b>Purpose:</b> A late fall and early winter medium to dark flower, with good growth habits.		
721—C. APALACHEE—	Petals 7" x 2¾", medium lavender, large orange-yellow labellum—December.	1½"	1.50
X			
Lc. HERTHA—	Petals 7" x 2¾", light lavender with magenta velvet labellum, gold eyes and veins in throat—June.		
	<b>Purpose:</b> All crosses made with Lc. Hertha have good color and texture, with remarkable shape.		

# McLellan Unflowered Seedlings

Unflowered seedlings of our own crosses, these plants are only a year or two away from blooming. Many, however, will flower on their next growth. They offer an excellent opportunity to improve your collection at a comparatively small cost, a program which is being adopted by many growers.

# Flowering-Size Plants

Each plant's flowering history is recorded on an accompanying label.

## What does this label mean?

This label which is marked 6/15/49 3 #2 means that three flowers of #2 grade were cut June 15, 1949. A date without a flower record indicates the repotting time.

## How we grade:

The width of the flower indicates the grade of the plant:

Up to 5" Spread	No. 4
5" to 5¾"	No. 3
5¾" to 6½"	No. 2
6½" and larger	No. 1

OUR PRICES ARE BASED ON THE SIZE AND QUANTITY OF THE BLOOMS, THE SIZE OF THE PLANT, AND THE NUMBER OF LEADS.

Here is a selection to tempt the orchid enthusiast, large or small.

NOTE: When two prices are shown opposite a pot size, intermediate prices frequently are available. IT WILL SAVE TIME IN FILLING YOUR ORDER IF YOU WILL STATE THE RANGE OF PRICES ACCEPTABLE TO YOU IN THE VARIETY AND POT SIZE YOU PREFER.

# Limited Offering

These plants are the same as the preceding ones in all respects excepting that we priced them somewhat lower, since they are available in only one or two plants in each size and kind, as listed. Thus, for this group only, a second choice should be made for each selection in the event that the plant you first select has already been sold.

		5"	7.50 - 12.00

## *Cypripediums*

These plants bear blooms unequalled in keeping qualities, both on the plant and as cut flowers.

Their temperature requirements permit a great deal of leeway for the amateur grower, as the plant will grow quite successfully in night temperatures ranging from 55 to 70 degrees. All plants listed have been flowered.

Name	Parentage and Description	Size	Price
<b>Cyp. callosum</b> (species)	—The foliage lovely mottled green. Dorsal sepal is white shaded to green at its base and striped with dark crimson. Petals pale green and pouch brown-purple.	5"	\$ 7.50 - \$12.00
<b>Cyp. MAUDIAE v. magnificum</b> , F. C. C., R. H. S. (callosum Sanderae x Lawrenceanum, Hyeantum)	—Universal favorite because of its lovely mottled green foliage and fine green and white long stemmed flowers.	3"	10.00
		4"	15.00
<b>Cyp. SAINT ALBAN</b> (Antigone x Harrianum)	—Exciting medium sized flower with deep mahogany red pouch and petals. Dorsal sepal has mahogany red sunrise shading to white at sides and top.	3"	7.50
		4"	10.00

Name	Parentage and Description	Size	Price
<b>Lc. SOLANO</b> (Lc. George Woodhams x C. labiata)	—Medium lavender—late fall.	6"	\$ 7.50 - \$18.00
<b>Lc. SUISUN</b> (C. Hentschelii x Lc. Wellsiana)	—Medium lavender, dark labellum—summer to late fall.	5"	7.50 - 10.00
		6"	10.00 - 15.00
<b>C. SYROS</b> (C. Enid x C. labiata)	—Medium lavender—early fall.	5"	5.00 - 10.00
<b>Lc. TEXAS</b> (Lc. Conquistador x C. Fabianid)	—Medium to very dark lavender—fall.	4"	4.00 - 5.00
		5"	5.00 - 10.00
<b>C. TRIMOS</b> (C. Trianae x C. Mossiae)	—Well shaped light to medium lavender flower, dark labellum—early spring.	4"	4.00
		5"	5.00 - 7.50
		6"	7.50 - 10.00
<b>Bc. VEITCHII</b> (syn. Digbyano-Mossiae)	—Medium lavender large flower, large fringed labellum—fall.	4"	4.00 - 5.00
		5"	5.00 - 7.50
<b>Lc. WELLSIANA</b> (C. Trianae x L. purpurata)	—Medium lavender with a dark labellum—early spring.	4"	5.00
		5"	7.50 - 12.00
		6"	12.00
<b>C. WINNEWASSA</b> (C. H. S. Leon x C. Santa Monica)	—Medium lavender, good shape, fine grower—winter.	4"	5.00 - 10.00

**CYPRIPEDIUM CALLOSUM**

Name	Parentage and Description	Size	Price
<b>Cyp. villosum</b> (species)	—Vigorous species with pouch and petals of yellow brown and dorsal sepal of brownish purple shaded with green.	4"	\$5.00
		5"	7.50

AN EPIDENDRUM IN BLOOM

- Den. pulchellum (Syn. Dalhousieanum)**—Sepals and petals tawny yellow, shaded with rose, labellum has two crimson spots—spring.  
**Den. superbiens**—Rich magenta—autumn, variable.

## Epidendrums

These are new colors in epidendrums, unobtainable before, and are compact growers compared to the usual. The delicate interesting shades were created as a result of years of hybridizing. Flowers are from  $\frac{3}{4}$  to 1 inch in diameter, and are borne in clusters, as in the photograph to the left. They appreciate a great deal of sun, and are quite easy to grow.

4" Plants \$6.00 5" Plants \$7.50

These hybrids are available in the following colors:

Tangerine Coral Red Fuschia Rose  
 Coral Rose Rose Yellow Gold

## Dendrobium Species

We are offering a small group of these popular natives of the Far East. Easily grown, they offer a fine variety of different types of flowers. Some are in clay pots, others on tree fern slabs, and we ask that you designate which you prefer when you order. Pot sizes range 3", 4" and 5", with most of the 5" pots being quite tall plants.

There is not a complete range of size and price for every plant, and we suggest that you tell us what price and size range would be acceptable to you when you order.

3" Plants: \$5.00 4" Plants: \$7.50 5" Plants \$10.00

### Name and Description

- Den. DRACONIS**—Flowers pure white, the lip stained with red, usually measures 1 1/2" across—spring and summer.  
**Den. FARMERII**—Straw yellow with a pink blush, golden yellow lip—spring.  
**Den. fimbriatum v. oculatum**—Rich golden yellow, with dark red spot at base of the lip—spring, variable.  
**Den. formosum v. giganteum**—Large, pure white, except for orange-yellow stain in labellum. Very fragrant—autumn.  
**Den. HILDEBRANDII**—Pale yellow with orange and yellow lip—spring.  
**Den. infundibulum**—Flowers borne in clusters about 4" across, pure white with yellow lip and throat—spring.  
**Den. moschatum**—Yellowish petals and sepals tinted with pink, lip yellow with two darker spots at base—spring and summer.  
**Den. PARISHII**—Rich dark rose, two purplish blotches in throat—spring.  
**Den. PIERARDII**—Blush white, suffused with rose, yellow lip with dark purplish veins—winter and spring.  
**Den. primulinum**—Sepals and petals pale rose lilac, lip spreading primrose yellow streaked with red at the base—early spring.

## Cymbidiums

These are the terrestrial orchids which throw spikes from 8 to 30 flowers to a spike, that keep from one to three months. The plants flower from the middle of the winter to early spring—a beautiful cymbidium in bloom is the highlight of any mid-winter garden.

Pricing is done in the usual manner at \$1.00 to 10.00 per bulb, depending upon the variety and quality of the flower. We expect from 1 to 2 flower spikes each winter in the 6" to 8" pots, 2 to 4 spikes in the 9" to 10" pots, and 3 to 8 spikes in the 12" to 14" pots, depending upon the variety.

We also have a group of unnamed, garden-type cymbidiums for the West Coast fancier, which should include such types as insigne, Pauwelsii, Ceres, Lowianum and grandiflorum.

Pot Size  
 6" to 10"

Price  
 \$10.00 - \$25.00

## Anthuriums

These unusual plants of great beauty will give you almost continual blooms throughout the year, for they last months, either on the plant, or cut. Most orchid collectors like to have one of these exotic plants in their collection to ensure having a bloom at times when the orchid plants are "between flowers."

Anthuriums range in color from pure white to a very deep red, with lovely foliage that is, in itself, an attraction.

### MATURE PLANTS

Good quality plants ranging in color from light pink to a nice red:

5" \$ 7.50  
 6" 9.00  
 7" 10.50  
 8" 12.00

Exceptional plants which include pure whites and outstanding reds:

5" \$10.00  
 6" 12.00  
 7" 14.00  
 8" 16.00

### UNFLOWERED SEEDLINGS

3" \$3.00 4" 4.00

### ANTHURIUM

# The Care of Orchids in the Home

More and more indoor gardeners are finding they can grow orchids in their modern, evenly heated homes with less trouble than most so-called "house plants."

The information which follows is general in nature, as indeed it must be, since there are thousands of different types of orchids. For the most part, it pertains to the "cattleyas," the most popular and well-known orchid, which you have seen in corsages many times. Where it does not, it is so noted.

From the time pollination takes place, it requires seven years approximately to produce a mature, flowering-size plant. The seed will take about one year to develop in the seed pod upon the plant. It is then planted under absolutely sterile conditions in a flask, or glass bottle, containing a nutrient agar solution. Here the seeds, hundreds of them to a bottle, will sprout into tiny seedlings. This takes about another year, after which the tiny seedlings are transplanted to "community" pots, ten, twenty, or more seedlings to each pot, where they grow for another year.

They then progress into successively larger pots, 1½" (thumb pots), 2¼", 3" and 4" at about yearly intervals. Plants will usually flower when they reach the 4" stage, about seven years from pollination.

After the plants reach maturity, they usually remain in the same pot for about two years, after which time they are "repotted." Your orchids are potted in a special material, usually "osmunda," dried fern roots, if they are epiphytes (i.e. cattleyas) or some combination of special materials if they are semi-terrestrial or terrestrial (i.e. cymbidiums).

Although no absolute rules can be written for orchid culture in such a limited space, since you are working with a living thing, the following suggestions will serve as a general guide for your culture:

**LOCATION:** Try to give orchid plants a position near a window with as much light as possible, providing there is positive protection against DIRECT MID-DAY SUN. Plants while in bloom can be placed anywhere at your pleasure, even in dark hallways.

**WATERING:** Water once a week with one cup of water for a 5-inch pot, and proportionately more for larger pots. During hot summer days, watering may be increased. Orchid plants must be permitted to dry out to some degree between waterings or the roots will change from the healthy white or greenish color to a brown, and die. Thus, do not permit the pot to rest in a saucer or bowl of water.

**TEMPERATURE:** Cattleyas like the usual comfortable, ordinary home temperatures.

**Odontoglossum** do well in the cooler rooms, in the cool conservatory or sheltered porch.

**Cymbidiums** can stand more cold than any orchid. In the San Francisco area, cymbidiums flourish in shady or protected gardens, in large pots in protected patios, or in unheated glasshouses.

**HUMIDITY:** Plants may be set on pebbles placed in an ordinary tray or flat bowl with water. These pebbles help to give added humidity by the evaporation of water kept about them. It is important that the water level be **below** the surface of the pebbles on which the pot rests, and at least one inch should be allowed between the level of water about the pebbles and the bottom of the pot.

The following books contain more detailed information on orchid plants, and have been published within recent years. Most of these you may obtain at your local book stores, and if not, we will be glad to supply them:

ORCHIDS ARE EASY TO GROW (Logan & Cosper)	\$6.00 postpaid
HOME ORCHID GROWING (Rebecca T. Northen)	6.00 postpaid
AMERICAN ORCHID CULTURE (Edward A. White)	6.00 postpaid
ABC OF ORCHID GROWING (John V. Watkins)	3.00 postpaid

## Suggested List for Beginners

We have selected these plants particularly for the beginner, although of course, anyone may select them. Most of them are "species," or non-hybridized plants. Because of their well defined flowering period, wealth of bloom, and their definite characteristics, species should be the foundation of every beginner's collection.

All of these plants are vigorous growers, and can be grown successfully in the home where no greenhouse is available, since they thrive at temperatures most comfortable to human beings.

### SPECIES

Name and Description	Size	Price	Name and Description	Size	Price
<b>C. GASKELLIANA</b> —Native to Venezuela. Light to medium lavender—late spring.	4" 5"	\$ 5.00-\$ 7.50 6.00 - 12.00	<b>C. WARSCEWICZII (C. gigas)</b> —Native to Colombia. Light to medium lavender, darker labellum with yellow eyes—summer.	4" 5" 6"	\$ 5.00-\$ 7.50 7.50 - 10.00 10.00 - 15.00

# Tree Fern Products and Containers

Orchids planted or displayed in these containers give a touch of tropical charm, and are considered a very attractive way of showing orchids. Many collectors pot their plants directly into the containers, while others use them as attractive containers for the clay pots.
